

## President's Message

### **Dear all MPMA members,**

It's almost end to the year of 2022 and I bet everyone have done so much to fulfill our commitment for ourselves, our family and our community!

I would like to say THANK YOU for all of you who exploring and walking the journey with me in then industry for the past one year. We stay positive and innovative in our business and our life throughout the challenges. We learn and move on with better knowledge and skill to develop a better future for our industry even though we have yet to achieve the best!

MPMA organized and planned various of activities for members and also actively engaged with PCOs who located at outskirts areas for membership expansion. Thank you all Exco member who spent extra time and effort to get things done as promised. We hope members and non-members have benefited from all the activities organized by MPMA and all the associate members.

There are 2 big events coming in the following years:

1. NCUP 2023
2. FAOPMA PEST SUMMIT 2025 in Kuala Lumpur

MPMA will be hosting the above events and these will be a grand and fruitful physical conference in Malaysia after the COVID-19 Pandemic. Stay tune for more info and please be part of it to make the event a success!

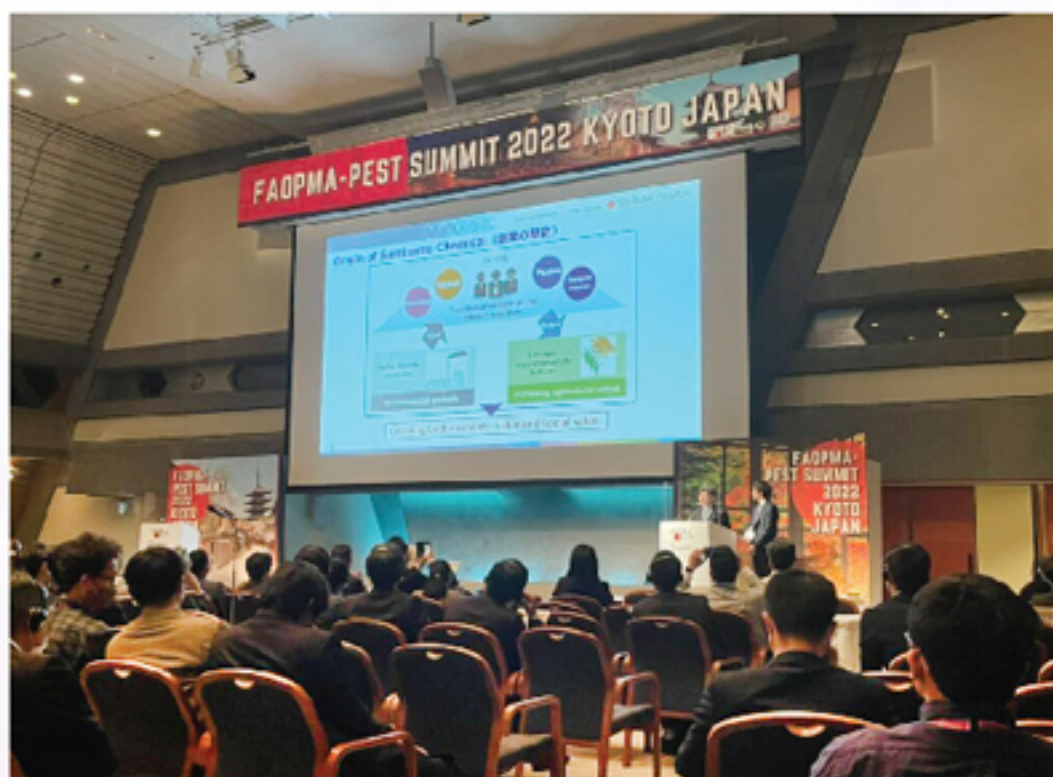

I would like to take this opportunity to wish all our MPMA members this December that HAPPINESS be at your doorstep. May it knock early, stay late and leave gifts of PEACE, LOVE, JOY and GOOD HEALTH behind for you & your family.

MERRY CHRISTMAS & HAPPY NEW YEAR!

Thank you.

**Ms Regine Lim**  
President  
Malaysian Pest Management Association (MPMA)

# FAOPMA 2022, Kyoto Japan

### Dear fellow members of MPMA,

To wrap up what the committee have done in year 2022, basically more on development on pest control industry knowledge, operating skill and management practice.

We have successfully arranged 7 webinars in this year which include topics as below:

1. Charlie Bug & Management Strategies.
2. Process of Product Registration and Safety Data Sheet.
3. Fumigation Talk.
4. Can Our Termiticides Sustain Very Well in Malaysian Soil & Environment: Guarantee vs Warranty
5. The life cycle of pesticide.
6. Marketing & Sales
7. The science behind space spray and residual treatment.

The committee will not stop this meaningful webinar here, but will continue to arrange more interesting topic webinar in year 2023 so that our industry can continue to grow and serve our community better.

Thank You

Lim Yu Chong  
VP Communication (2021-2023)  
Malaysian Pest Management Association (MPMA)

## VP - Membership Message

### **Dear fellow members of MPMA,**

Thank you for supporting MPMA throughout the years and for the new members, a warm welcome to be part of us. We all admit covid19 has brought much challenges into our life but the nature in us as a pest management professionals, we adapt it we conquer it. However, no matter how well we members managed it we still have common challenges faced. Till today, we are unable to overcome issues of non-license pest operators, pesticides selling at online platforms, black market pesticides and others too.

All these are hard for us to bargain for actions to take because our voices are mild. It is also hard to push for changes since we are merely 20% of registered operators with Pesticide Board of Malaysia. More importantly MPMA care for the industry and we know improvement can be done if we unite together and remove this hurdle. Please be the flag bearer of MPMA and outreach to interested operators and become a member today. We believing in working together, growing together and improving together.

In conjunction with the upcoming year, MPMA is presenting to you 2 complimentary pieces of vansticker for each renewal member. Any interested member who wants own more may simply purchase them at RM10.00 each. At the same time, hereby wishing all esteem members A Happy Merry Christmas and Happy New Year ahead.

Thank You

Belven Lee Ban Chye  
VP Membership  
Malaysian Pest Management Association (MPMA)

### FAOPMA PEST SUMMIT - MPMA September report 2022

During WorldPest Day, 6 June 2022, Malaysia Pest Management Association (MPMA) members had carried out some Corporate Social Responsibility (CSR) initiatives for the benefit of the communities who needed Pest Control services especially schools and orphanages.

As shown in the photos, Pest Link Sdn Bhd from Sabah provided cockroach and ant treatment for an orphanage home. While Innopest Sdn Bhd's service technicians carried out fogging treatment against mosquitoes in a school.

We would like to encourage more Pest Control companies in Malaysia across Northern region, Southern region, East Coast and East Malaysia to participate in this event every year so that more communities can enjoy the cares and love from the Pest Control industry. Imagine if 100 Pest Control companies in Malaysia are committed to give back to the community, these 100 schools, orphanages or old folk homes, will have the opportunity to return to a healthier living environment.

We believe this meaningful day and event may not be participated by Malaysian Pest Control industry only but Pest Control Managers from other countries too. Together we can create awareness to the public about pest knowledge and pest management industry.

Reported by,  
Lim Yu Chong  
VP of Communication, MPMA

## MPMA WEBINAR 5.0

**Tues day | June 21 | 10AM -12PM**

**The Life Cycle Of Pesticides**  
Up until now, we are very familiar with the concept of pest such as termites, mosquito, etc. But for this topic we will explore more on the pesticide or chemical itself, the history of pesticide, how it affects to the public health/food, formulation of pesticide and how it degrades in the environment. This topic will make us understand more on the pesticide so we can get an effective treatment.

## MPMA WEBINAR 7.0

### The Science Behind Space Spray and Residual Treatment

Most industry stakeholders are very well informed on the pests and pesticides, the number of resources out there is vast and readily available. However, there seldom is a tie up between such common knowledge together with knowledge of the right selection of equipment, application technique etc. Such a tie up is necessary to provide applicators with the knowledge on how best to deploy their complete arsenal appropriately to enhance the results of integrated pest management programmes.

Our topics covers some of the best practices on vector control formulations, applications and equipment micron size technology adopted from renown institution the likes of World Health Organisation (WHO). We aim to provide attendees with the information to further enhance the effectiveness of their space and residual spraying operations by giving them the background on why certain considerations are always at the forefront before carry out individual application techniques.
